FOR IMMEDIATE RELEASE

August 27, 2009, Envision Technology, Inc is pleased to announce the offering of the accessaphone software product suite on the GSA Schedule -- Contract Number: GS-35F-0243S

Enhanced Accessibility and Usability for VOIP digital Phone Systems

Tenacity, an effective leader within the field of accessible telephony, designed and engineered **accessaphone™** software applications. Accessaphone provides a comprehensive list of communication interface options for people in the workforce. The various call control options include, but are not limited to:

- **accessaphone™** with text to speech, keyboard, and speech recognition controls for individuals who are blind/low vision/mobility impaired.
- **accessaphone™ Total Conversation** with video, audio, and real time text for people who are deaf/hard of hearing.

All accessaphone™ applications incorporate intuitive hotkeys to support individuals with cognitive impairments as well as alternative input devices for people with mobility impairments. For the organization, enterprise licensing creates a single, entity-wide solution, with each individual's unique assistive technology (AT) needs matched by accessaphone™ built-in product/feature options. Additionally, the accessaphone™ enterprise suite includes a nationally known Federal Communications Commission certified Video Relay Service (VRS) provider to ensure that the accessaphone™ Total Conversation (aTC™) is a VRS-ready solution for deaf and hard of hearing employees, including direct dial connection to VRS, provisioning of real ten-digit phone numbers and e911 services.

About Tenacity Operating, LLC

Tenacity is a catalyst in changing the parochial mindset from accommodating a few employees to incorporating accessibility into the workplace communication infrastructure for all employees, regardless of ability or disability. Tenacity designs, engineers, and distributes accessaphone™ software applications necessary to be an effective leader within the field of accessible telephony and related modes of communications. As an industry leader, Tenacity is highly sought after and trusted by individuals, OEM's, advocacy and support groups, government agencies, and employer organizations, all of whom have a vested interest in assuring that telephones are accessible to everyone.
